

SHAYDA MAHER

San Diego, CA | (858) 212-2480 | mahershayda@gmail.com | linkedin.com/in/shaydamaher | github.com/shayda-maher

SUMMARY

Computer science student with seven years of professional experience building automated reporting pipelines in Python and SQL across state, county, and transit agencies. Has owned systems end to end — schema, queries, validation logic, documentation, and handoff to the people who maintain them. Seeking a software engineering internship in San Diego.

EDUCATION

Oregon State University — Post-Baccalaureate BS, Computer Science (Applied) · Expected 2028

Mills College at Northeastern University — BS, Biochemistry · Oakland, CA

TECHNICAL SKILLS

Languages: Python, SQL, VBA

Libraries: Pandas, NumPy, Matplotlib, Seaborn

Databases: Relational schema design, query development and optimization, database administration

PROJECTS

SQL Business Analysis Portfolio · github.com/shayda-maher/SQLScripts

- Jupyter notebooks solving operational problems against public sample databases (Northwind, video rental schema), using structured queries across normalized schemas with the reasoning documented alongside the results.

EXPERIENCE

California Department of Transportation (Caltrans) · San Diego, CA

Analyst II · promoted from Associate Governmental Program Analyst · Jul 2023 – Present

- Designed data validation and error-checking routines with field staff and engineers so inconsistencies surface before publication rather than after.
- Built dashboards and recurring reporting products consumed by division leadership to monitor expenditures and identify variances.
- Developed workload projections measuring current-period activity against the same period in prior fiscal years.

County of San Diego, Health & Human Services Agency · San Diego, CA

Operations Research Analyst II · Mar 2022 – Feb 2023

- Automated monthly and quarterly reporting workflows in Python and SQL, reducing processing time by 95%.
- Replaced a manual monthly compilation with an automated dashboard, cutting recurring reporting lead time by roughly 80%.
- Built Power BI and Tableau dashboards with measure logic in PowerQuery and DAX, documenting every metric definition alongside the product.
- Designed a facilities and employee assignment tracking database with structured documentation and data governance protocols.
- Reconciled personnel data across disparate systems, writing validation rules that made findings reproducible and auditable.

Metropolitan Transit System (MTS) · San Diego, CA

Revenue Operations Supervisor · promoted from Data Analyst · May 2021 – Mar 2022

- Built Python and Excel reporting automation that halved processing time and moved reconciliation from no audit trail to full traceability.
- Developed a preventive maintenance tracking model from SAP data that improved operational productivity by 33%.
- Supervised reconciliation of \$100K+ in weekly fare revenue at 99% accuracy with daily variance tracking and dual sign-off.

Data Analyst · Nov 2019 – May 2021

- Rebuilt a manual monthly revenue summary as a dashboard-style product with seasonal and prior-fiscal-year baselines.
- Analyzed operational and financial data and improved data reliability across reporting systems.

Rady Children's Hospital · San Diego, CA

Program Evaluation Specialist II · promoted from Research Associate II · Jul 2018 – Oct 2019

- Served as database administrator for the program's clinical database; wrote and maintained SQL queries against changing requirements and monitored performance and data integrity.
- Automated Excel-based reporting in VBA, improving accuracy and reproducibility.
- Designed KPI dashboards and evaluation frameworks for state- and federally funded programs.
